

Living Lab

THE SPACES

MOSAICODANZA

The Living Lab has been realised with the contribution of European Union within the initiative Next Generation EU - TOCC for the Ecological Transition for Cultural and Creative Entities, PNRR, Mission 1 – Digitalization, innovation, competitiveness and culture, Component 3 – Tourism and Culture 4.0 (M1C3).

The space is versatile and can be used by artists, programmers, cultural workers and communities, for residencies, workshops, labs, events, masterclasses and much more.

The Living Lab is powered by renewable sources of energy (2 solar panels and a generator). All the areas of the Living Lab are provided with a wifi network.

The stage

- 7 x 9 meters
- covered by a stretch tent
- two structural poles in the centre
- black dance rug

The tent

- 20 mq of internal surface, can host max. 4 people
- with windows and insect screen
- Furnished with camp beds, mattresses and boxes
- Lights and energy

The kitchen

Stove top in steel, furnished with pans, plates and cutlery.

Toilet facilities

The toilet uses a principle of separation between solid and liquid waste. This allows for the proper decomposition of organic matter and its transformation into humus, which is useful for fertilising the plants surrounding the space.

The shower is outdoors, with partial coverage. Hot water is generated by solar rays absorbed by the shower during the day.

The shower

The garden

The space is composed of a large number of plant species that provide shade, beauty during flowering periods and fragrances.

See you soon

The space is available for private events and for artistic and collaborative projects. For further information, please contact us by email
